

Modular Parklet

The Cyclehoop Modular Parklet is the first of its kind in the UK and is designed with a Healthy Streets approach at its heart. Its components address design and safety standards that can be replicated in various configurations across cities and urban environments.

This innovative design is based upon expandable modules that can easily be configured to make the most efficient use of otherwise redundant space, as well as giving you the opportunity to choose a range of layouts depending on your requirements, i.e. adding more cycle parking, planters or seating.

Specification

- Easy to transport, quick to install, durable and easy to expand
- Includes sitting spaces, cycle parking and a decking surface that expands the pavement area
- Units are delivered preassembled prior to installation
- Configurable in different ways depending on available space
- Natural extension of the pavement
- Protected sitting area
- Multiple integrated cycle parking options
- Multi-purpose planters add greenery to the area, protect people from cars, and have high-vis elements for added safety
- Increased security with Solar decking lights
- Wheelchair friendly where there is a curb
- Space for advertising
- Rainflow is filtered under the platform.
